# Brief Introduction of the School

The School of Economics and Management of Beijing Forestry University was established in 1987 based on its historical origins including the Agriculture and Forest Programs of Imperial University of Peking established in 1902, the Forestry Economics Specialty of Beijing Forestry College in 1959 and its Department of Forestry Economics in 1982. In its developing course, despite its ten years of southwest migration and suspension during the Cultural Revolution, the forestry economic workers have not forgotten their initial intentions and kept their mission in mind. Since they are always making unremitting efforts, the school has grown into a pioneering one which develops rapidly with reasonable discipline structure, distinctive educational features, and comprehensive strength. It has established a relatively complete talent cultivating system, consisting of undergraduate education as its main component and the constituents of postdoctoral, doctoral, master's, professional master's and dual degrees. From this high-level talent training base, more than 20,000 students, developing in an all-around way, have graduated and made active contributions to China's forestry development and ecological construction. Among them, there are a large number of senior management talents including six on or above the deputy ministerial positions as well as experts and scholars well-known at home and abroad.

More than 3,300 students, including 2,500 undergraduates and 800 domestic and international postgraduates are studying in nine departments containing 11 undergraduate specialties, 10 master specialties and doctoral programs of the first-class disciplines of agriculture and forestry economics and management. There are 158 faculty members. Therefore, the school enjoys the greatest numbers of disciplines, specialties and students compared to other schools of Beijing Forestry University.

The school has established a main structure characterized by agricultural and forestry economics and management as its main body, and supported by applied economics, and industry and business management as the two wings. It has thus formed a large development pattern of mutual support by its characteristic disciplines and other ones in economics and management fields. Therefore, the discipline foundation has been laid for the school long-term sustainable development.

The discipline of agriculture and forestry economics and management, as an important and characteristic one of the school, plays an essential role in leading the disciplines advancement. The discipline of forestry economics and management was appointed the right to confer master degree in 1984 and doctoral degree in 1995 and then was identified as the national key construction discipline of "211 Project" by the Ministry of Education. After the first group of China's doctoral students in the forestry economics and management field graduated in 1999 from the school, it passed the ministry's acceptance of the first and second phases of "211 Project" with high quality respectively in 2001 and 2006 and afterward entered its third phase. In 2003, the first group of postdoctoral mobile stations of agriculture and forestry economics and management were founded in the school. Four years later, the discipline forestry economics and management was named a key cultivation one at state level and its specialty agriculture and forestry economics and management was named a characteristic one at state level by the Ministry of Education, and a characteristic one at the Beijing municipal level. Its teachers obtained the hour of outstanding teaching team in Beijing the next year. In 2012 and 2016, twice the same discipline was ranked the eighth of the First-Level Disciplines of the country by the Discipline Evaluation Group of the Ministry of Education. Winning the title of key discipline of Beijing in 2012, in 2015 agriculture and forestry economics and management was again awarded the key discipline of the State Forestry Administration. The discipline In 2018 was determined to have the title of double first-rate key cultivation discipline by Beijing Forestry University.

# Scholarships

## Core Courses

### • Core Courses of Master in Forestry Economics and Management

Forest Ecology
Microeconomics
Natural Resource and Environmental Economics
Forestry Technology Frontier
Macroeconomics
Econometrics
Forestry Economics
Frontier topics of forest economics and policy
Modern Forestry Management
Forestry Policy

### • Core Courses of Doctoral Program in Agricultural and Forestry Economics and Management

Theoretic Frontier of Economics
Comprehensive Discussion on Agricultural and Forestry Economic and Management
Research Practice and Methods of Agricultural and Forestry Economics

### Chinese Government Scholarship (CGS)

In order to enhance the mutual understanding and friendship between students from all over the world and promote the communication and cooperation between China and other countries, Chinese government has established Chinese Government Scholarship. China Scholarship Council (CSC) is authorized by Ministry of Education of People' s Republic of China to be responsible for the acceptance and administration of the scholarship applications. Chinese Government Scholarship fully or partially covers the tuition fee, accommodation fee, living allowance and comprehensive medical insurance fee for undergraduates, master students and doctoral students.

### MOFCOM Scholarship

MOFCOM Scholarship is set up by Ministry of Commerce of People' s Republic of China to further strengthen the communication and cooperation between China and other countries as well as to develop talents for developing countries. MOFCOM Scholarship fully covers the tuition fee, accommodation fee, resettlement fee, monthly stipend, comprehensive medical insurance in China and one-time round-trip international airfare. Those who achieve the academic performance assessment can continue to enjoy the full scholarship in the second year.

# Faculty and Research

Chen kai  
professor

Research Interest:  
Consumer behavior, green marketing, marketing strategy and management, and forest biomass energy industry development

Chen Xiaoqian  
Associate professor

Research Interest:  
Forestry investment and credit

Cheng Baodong  
professor

Research Interest:  
Forest product market and trade

Fu Yizhong  
Professor

Research Interest:  
Service industry opening and service trade  
Service innovation and policy

Hou Fangmiao  
Professor

Research Interest:  
GVC, International trade in forest products,  
International procurement and green procurement management

Jian Xuemei  
Associate professor

Research Interest:  
Forestry Economics and Management, Resource and Environmental Economics,  
Applied econometrics

Li Chenying  
Associate Professor

Research Interest:  
Accounting theory and method, Corporate Governance

Li Qiang  
Associate professor

Research Interest:  
Rural development, agricultural economic theory and policy, farmer economics  
and economic modeling

Li Xiaoyong  
Associate professor

Research Interest:  
Marketing management, green marketing, green procurement

Miao Dongling  
Associate professor

Research Interest:  
International trade practice, forest products trade

Wang Lu  
Associate professor

Research Interest:  
International trade theory and policy

Wang Hui  
Associate professor

Research interest:  
Forestry resource economy and policy

# Faculty and Research

Wang Lanhui  
Associate professor

Research Interest:  
Resource and environment statistics, quantitative economy, application statistics

Wen Yali  
Professor

Research Interest:  
Reform of forestry property rights system, conservation area management and biodiversity economics and policy, green poverty reduction, urban forestry

Wu HongMei  
Associate professor

Research Interest:  
International economics and trade, forestry economic theory and policy

Xie Yi  
Professor

Research Interest:  
Household forest management behavior, forestry system reform, economic theory and policy of renewable resources

Xue Yongji  
Professor

Research Interest:  
Innovation and entrepreneurship in agriculture and forestry ,Marketing of agricultural and Forestry products ,Policy simulation and simulation

Yin Zhonghua  
Associate professor

Research Interest:  
The intersection of international economy and resource economy , The intersection of international and industrial economy.Econometrics,Business big data analysis and R language programming

Chang Yu  
Associate Professor

Research Interest:  
environmental economic policy  
ecological efficiency. circular economy. industrial ecology

Yu JiAn  
Professor

Research Interest:  
Science and technology innovation management and policy Strategic management and innovation, Chinese style management and non-market strategy regional development strategy

Zhang CaiHong  
Professor

Research Interest:  
Forestry investment and risk management,Forestry economic theory and policy Forest biomass energy industrialization

Zhang Yang  
Associate professor

Research Interest:  
Property management and community governance,Real estate finance experiment

Zhang YingJie  
Associate professor

Research field:  
Economics of Cities and real estate

Zhang Ying  
Professor

Research interest:  
Value evaluation and accounting of natural and environmental resources regional economics

Zhou Jianhua  
Associate professor

Research Interest:  
Agricultural economic theory and policy

# Starting at BFU

## 1 Find your program

Look for the program you are interested in to start, and connect with professors to acquire an acceptance letter

## 2 Check the admission requirements

Check both the academic and language requirements for your application. All candidates with strong academic potential with a minimal Bachelor's Degree in related majors will be considered.

## 3 Understand the fees and scholarships

Make sure you are up to date with costs of your application, tuition, plus the costs of living. If you need financial aid, BFU has a variety of scholarships on offer to incoming international students.

## 4 Complete your application

Submit an online application with supporting documentation required.

## 5 Accept your offer

You will receive an offer letter once your application is successful.
