

Undergraduate Program of Rehabilitation Therapeutics Major (4 Years)

1. Orientation

This program intends to meet the need of economic, social, cultural and scientific advances. It will enable students to understand the essential theory of rehabilitation therapeutics, basic knowledge of medicine and relevant natural science information, thus preliminarily conduct rehabilitation treatment, assessment and prevention for common conditions and disabilities and improve their social communication ability and professional ethics required of a high-quality rehabilitation therapist.

2. Main Courses

- Basis of Chinese medicine
- Meridians and points
- Normal somatology
- Acupuncture and tuina therapeutics
- Sports anatomy
- Traditional Chinese rehabilitation technique
- An overview of rehabilitation medicine
- Rehabilitation assessment
- Rehabilitation therapies
- Clinical rehabilitation
- Biomechanics
- Medical ethics

Teaching Methods

These include 1:1 ratio between classroom lectures and practice, case studies, PBL teaching and group training. A comprehensive training center is available and equipped with facilities of physical therapy, occupational therapy, speech and hearing therapy and traditional Chinese rehabilitation techniques. In addition, synchronized video teaching from overseas universities may also be possible in the near future.

3. Graduation and Academic Degree

A Bachelor of Medical Science will be awarded upon completion of

- Required credits of all courses in the teaching scheme
- General points average (GPA)
- Pass of all examinations
- New HSK-5 \geq 180 (excluding those of Chinese origin)

4. Future Career Development

After graduation, students may work in the rehabilitation department of Chinese, Western or Integrative Chinese and Western medical institutions, sports rehabilitation institutions and rehabilitation center for senior citizens. Alternatively, they may work in acupuncture, tuina, traumatology and physiotherapy departments of hospitals. They can also conduct education and research in rehabilitation medicine or rehabilitation-related disciplines in medical schools.
